Dr. Anthony Brown

(Universiteit Leiden, Netherland)

First science harvest from the Gaia sky

I will provide an overview of the Gaia mission, discussing the scientific motivation and the measurement principles. This is followed by an overview of the first Gaia data release (Gaia DR1), and a summary of the scientific highlights achieved since the publication of Gaia DR1. I close with a look ahead at the second Gaia data release.

Montag, 29. Mai 2017, um 15:00 Uhr im HS
