

## Seminars: Sommersemester 2019, Mo. at 15:00 Littrow Lecture Hall

Day	Speaker	Institute	Title	Host
04. März	<i>Semester introduction</i>			
11. März	Lindsay Fletcher	Glasgow	Energy transport and dissipation in solar flares	Boro Saikia
18. März	Peter Scicluna	ESO/Garching	Properties of dust and cold molecular gas around evolved stars	Hron
25. März	Eike Günther	Tautenburg DE	Cool planets of Cool stars	Kislyakova
01. Apr.	Katy Chubb	SRON	The search for exoplanet molecules	Hron
08. Apr.	Klaus Dolag	MPA	Connecting across Scales: From Galaxies into the Cosmic Web with the Magneticum Simulation	Ziegler
29. Apr.	Chris Belzycynski	Warsaw		Wahlen
06. Mai	Victor See	Exeter		Boro Saikia
13. Mai	Ryan Leaman	MPIA Heidelberg	New methods for recovering galaxy merger histories and what they tell us about the nature of dark matter	v. de Ven
20. Mai	Tereza Jerabkova	ESO UNI Bonn	The galaxy-wide variable stellar initial mass function and its effect on chemical evolution	v.de Ven
27. Mai	Enrica Lodice	INAF Capodimonte	The Deep (photometric and spectroscopic) Surveys of the Fornax Cluster	v.de Ven
03. Juni	Peter Abraham	Konkoly Budapest	V346 Nor: the post-outburst life of a FUor	Güdel
17. Juni	TBD			
24. Juni	Reiner Spurzem	Heidelberg/Beijing	The search for black holes using supercomputers	Hensler

*Organized by M. Güdel & B. Ziegler*
