

Seminars: Wintersemester 2018, Mo. at 15:00 Littrow Lecture Hall

Day	Speaker	Institute	Title	Host
1 Oct	<i>Semester introduction</i>			
8 Oct	Stephanie Juneau	NOAO	The multi-scale interplay between black hole and galaxy growth	Hirschmann
15 Oct	Dagmara Oszkiewicz	Poznań, Polen	Testing the planetesimal formation model through a survey of V-type asteroids	Galiazzo
22 Oct				
29 Oct				
5 Nov	Martin Volwerk	WF Graz	The Io Plasma Torus – Old stuff and new insights	Kislyakova
12 Nov				
19 Nov	Nikolai Erkaev		MHD aspects of interaction between stellar wind and exoplanets	Kislyakova
26 Nov	Thorsten Naab	MPA	The cosmological evolution of massive early type galaxies and their centers	Hirschmann/ Ziegler
3 Dec				
10 Dec	Stefano Zibetti	INAF - Arcetri	“Internal” scaling relations of stellar population properties in present-day galaxies	Ziegler
7 Jan	Daniel Le Heron	DGS	Earth’s Icy Past: Tales from the Rock Record	Johnstone
14 Jan	Ansgar Reiners	UNI Göttingen	M dwarfs, planets and their atmospheres- CARMENES results after the first three years	Güdel
21 Jan	Karan Molaverdikhani	MPIA Heidelberg	Diversity of exoplanet atmospheres: from simulations to observations	Iro
28 Jan	Athanasia Nikolaou	TU Berlin	Terrestrial magma ocean thermal evolution and outgassing: Building an atmosphere under the young Sun.	Iro

Organized by B. Ziegler & M. Güdel
